Paired one-factor ablations vs final design (500 seeds; filled = Holm-adjusted p < 0.05; bars: 95 % bootstrap CI)
Order 2 (constant velocity)
Ambush hold enabled
Controller at 20 Hz
Deviation pole p = 10
Jerk noise sigma_j = 40
Instant-fire threshold 0.999
Coast threshold 0.75
No class re-identification
Turret starts at 60 deg
Deviation pole p = 30
Order 3 (Singer acceleration)
